

[TLP:AMBER] · CONFIDENTIAL · URL / DOMAIN ANALYSIS · GHOSTWIRE CTI v6

[ANALYSIS TARGET]

http://165.227.155.54/hiddenbin/Space.x86

[THREAT LEVEL]

CRITICAL

[RISK SCORE]

95/100

[CONFIDENCE]

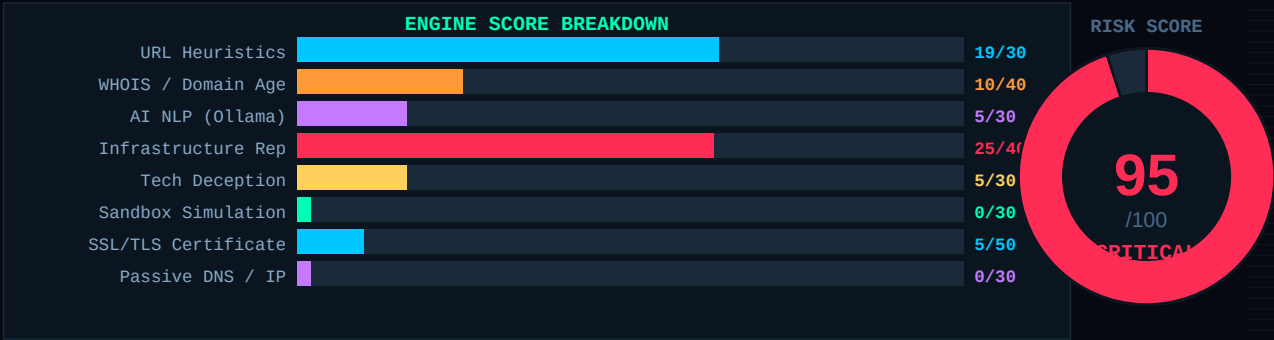

65%

■ Multiple independent engines confirm active malicious infrastructure.

TIMESTAMP UTC	2026-05-24 08:01:34 UTC
PIPELINE	URL / Domain Analysis
IOCs IDENTIFIED	4
ANALYSIS DURATION	38.9s
ENGINES RUN	10 detection engines
IP ADDRESS	165.227.155.54
VT DETECTIONS	13/92

This report is generated automatically by GhostWire CTI v6. Results should be reviewed by a qualified security analyst. IOC data sourced from VirusTotal, AbuseIPDB, Shodan, GreyNoise, URLhaus, OTX, Hybrid Analysis.

Generated: 2026-05-24 08:01:34 UTC | GhostWire CTI v6 | stay ghost.

INFRASTRUCTURE OVERRIDE ACTIVE – VT returned >8 malicious detections. Score locked to CRITICAL.

1. EXECUTIVE SUMMARY

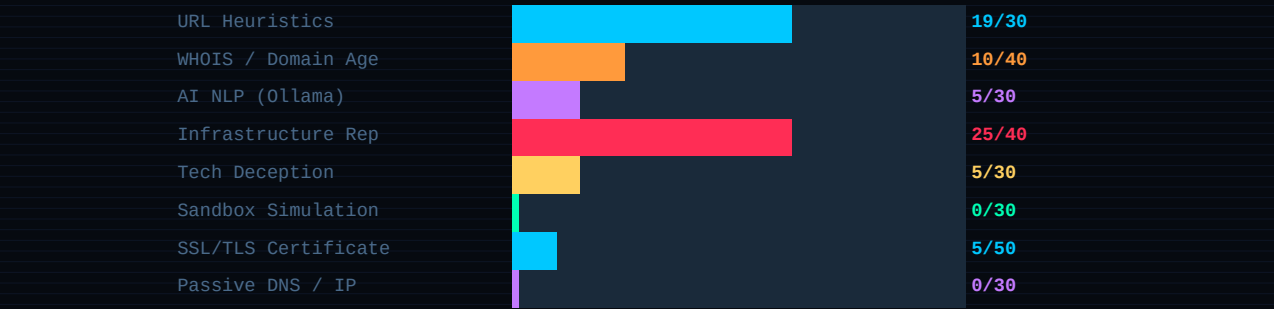

Multiple independent engines confirm active malicious infrastructure.

VERDICT: CRITICAL RISK – Score 95/100. 3 detection engine(s) triggered: URL Heuristics, WHOIS/Domain Age, Infrastructure Rep.. INFRASTRUCTURE OVERRIDE ACTIVE: VirusTotal confirmed more than 5 malicious detections. Final verdict is locked to CRITICAL regardless of other engine results. 4 Indicator(s) of Compromise identified: IP:165.227.155.54, VT_MALICIOUS:13_ENGINES, NO_TLS, URLHAUS_OFFLINE:malware_download.

AI Assessment (Ollama – local inference):

The URL suggests a phishing attempt using fear of missing out on space-related content.

2. ENGINE SCORE BREAKDOWN

Scoring Override Rules Applied:

- > INFRASTRUCTURE OVERRIDE: VT=13 malicious (threshold >8). Score locked to CRITICAL.
- > ■ URLhaus score contribution: +10 (query_status=ok, url_status=offline, urls_found=0)

3. SOURCE INTELLIGENCE

Source	Result	Impact
VirusTotal Engines	13/92 malicious	Primary
VT Community	0 malicious votes	Supplemental
VT Related Files	0 malicious	Supplemental
AbuseIPDB	0% confidence, 0 reports	Primary
SPF Record	Missing	Auth
DMARC Record	Missing	Auth

4. INDICATORS OF COMPROMISE (IOCS)

- * IP:165.227.155.54
- * VT_MALICIOUS:13_ENGINES
- * NO_TLS
- * URLHAUS_OFFLINE:malware_download

5. DETECTION SIGNALS BY ENGINE

URL Heuristics

- > URL uses a raw IP address instead of a domain
- > URL uses plain HTTP (not HTTPS)
- > Multiple subdomains (2 levels) – review carefully

WHOIS / Domain Age

- > Could not determine domain creation date

AI NLP

- > AI detected psychological manipulation tactics

Infrastructure

- > No DMARC record – phishing emails bypass email authentication
- > ■ VirusTotal: 13/92 engines MALICIOUS
- > ■ VT Community: No comments yet for this target
- > ■ VT Relations: No related files found
- > AbuseIPDB: No abuse reports for 165.227.155.54

Tech Deception

- > Deep subdomain nesting (2 levels) – possible brand spoofing

SSL/TLS

- > Target uses plain HTTP – no TLS certificate present

Passive DNS / IP

- > Passive DNS: No anomalies detected

7. BEHAVIORAL SIGNAL SUMMARY

Signal	Status
Urgency Language	Not detected
Financial Threat	Not detected
Manipulation Tactics	DETECTED
Credential Harvesting	Not detected
Fake Login Page	Not detected
Malware Dropper	Not detected
Crypto Drainer	Not detected
Tor Exit Node	Not detected
VPN / Proxy	Not detected
Brand Squatting	Not detected
Infrastructure Override	DETECTED
Subdomain Trap	Not detected

8. RECOMMENDED MITIGATION STEPS

- 1. ■ DO NOT visit, click, or interact with this URL under any circumstances
- 2. ■ If you already visited – change ALL passwords from a clean device immediately
- 3. ■ Contact your bank/financial institution immediately if credentials may be compromised
- 4. ■ Report to your security team as Priority 1 incident
- 5. ■ Forward phishing email to: reportphishing@apwg.org and your email provider
- 6. ■ Block the domain and IP at firewall / DNS resolver level
- 7. ■ Submit all IOCs to your SIEM / threat intelligence platform
- 8. ■ Enable Multi-Factor Authentication (MFA) on all critical accounts
- 9. ■ Keep browser, OS, and security tools updated
- 10. ■ Report suspicious messages to your organisation's security team
- 11. ■ Key IOCs for threat intel: IP:165.227.155.54, VT_MALICIOUS:13_ENGINES, NO_TLS, URLHAUS_OFFLINE:malware_download

[TLP:AMBER] CONFIDENTIAL · FOR INTERNAL USE ONLY · Results must be validated by a qualified security analyst before action. AI inference performed locally – no data transmitted to external AI services.
