■ 8. RECOMMENDED ACTIONS

1. Block this IP at perimeter firewall, WAF, and email gateway.
2. Search SIEM logs for all historical connections from this IP.
3. Identify and investigate all internal systems that communicated with this IP.
4. Implement a Tor exit node blacklist (e.g. DanMeUK list) on the firewall.
5. Report to AbuseIPDB to contribute to community threat intelligence.
6. Add to threat intelligence feeds and update SIEM detection rules.
7. Review and harden network egress filtering policies.
